SUMMARY

Senior React Native Engineer experienced in building production mobile applications for real-world business use. Strong background in scalable systems including POS platforms, multi-application architectures, and service-based apps. Focused on performance, clean architecture, and delivering stable, maintainable solutions across Android and iOS.

TECHNICAL PROFICIENCIES

React Native | TypeScript | JavaScript (ES6+) | Redux Toolkit | REST APIs | GraphQL | Firebase (Realtime, Storage) | Supabase (Realtime, Storage) | Realm (Offline Storage) | CI/CD Pipelines | Git (Bitbucket, GitHub) | Sentry | Jira | Next.js | Vercel | App Deployment

EXPERIENCE

- **Senior Mobile App Developer (React Native)**

Future Dev Solutions | Nov 2024 to Present

- Led development of multiple production mobile applications across POS systems, AI-based platforms, and service-oriented solutions
- Delivered a multi-application Restaurant POS system including Waiter, Kitchen, Kiosk, Booker, and Admin modules
- Built an AI-based image generation application (Pixsy) with focus on performance and smooth user experience
- Developed salon management applications (Global Customer & Staff Apps) covering booking, payments, scheduling, and operational workflows
- Integrated third-party services including payment gateways and real-time APIs
- Worked with CI/CD pipelines, Bitbucket, and automated build processes for efficient releases

- **React Native Developer → Project Lead (Styley)**

The First Sol | Oct 2023 to Nov 2024

- Started as React Native Developer and progressed into a lead role on Styley (AI-based image generation application)
- Led development of core features and overall application structure
- Designed UI architecture and improved performance for a smooth user experience
- Integrated backend services and third-party APIs including Supabase
- Ensured code quality through refactoring, debugging, and maintaining application stability in production
- Coordinated with team members to maintain consistency and timely delivery

- **React Native Developer**

Xentro Solutions | August 2022 to Sep 2023

- Developed mobile applications using React Native with Firebase and real-time database integrations
- Integrated Google Maps API for location-based features
- Implemented SMS functionality using third-party services
- Built offline-first features using Realm for improved user experience
- Managed application state using Redux Toolkit and handled API integrations

EDUCATION

- BS Computer Science
2017 to 2021
The Islamia University of Bahawalpur
- MS Computer Science
2022 to 2024
The Islamia University of Bahawalpur

CERTIFICATIONS

- E-Rozgaar Mobile App Development Program
- React Native – The Practical Guide (Udemy)

LIVE PROJECTS

- Global Staff App:
